A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION. - Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication. - If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely. - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication. - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on February 23, 2004 has been entered.

Claim Rejections - 35 USC § 112

- The following is a quotation of the second paragraph of 35 U.S.C. 112:
 The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.
- 3. Claim 9 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 9 recites the limitation "said resilient portions" in line 1. There is insufficient antecedent basis for this limitation in the claim since only one resilient portion is recited in claim 1.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

Application/Control Number: 10/052,160

Art Unit: 3726

A person shall be entitled to a patent unless -

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

5. Claims 1-7, 10 and 22 are rejected under 35 U.S.C. 102(a) as being anticipated by Fortenberry (US Patent 6,578,240).

With regards to claims 1, 2, 5 and 22, Fortenberry discloses a snap-fit spacer system comprising a fastener member 12 comprising a body portion 66, a resilient portion 54, and a locking assembly 60 with a first camming surface 64 and a first locking surface 62, the resilient portion biasing the locking assembly into a first position, a spacer element 14 comprising an interior bore 28, a plurality of axially aligned recesses formed in the interior bore (see figure 3), wherein the locking assembly may be received in any one of a number of the plurality of recesses to prevent the fastener member from being withdrawn from the spacer element, see column 4, lines 39-67, column 5, lines 1-36, column 6, lines 10-35 and column 8, lines 37-39.

For claims 3 and 4, Applicant should note that because the locking assembly is made of plastic, the locking assembly will be compressed to allow it to be inserted in the recess and once seated in the recess the locking assembly will spring back into its original shape.

For claim 6, see column 5, lines 22-25.

For claim 7, see figure 3.

For claim 10, holes 30 could be used as depth control holes.

Application/Control Number: 10/052,160 Page 4

Art Unit: 3726

Claim Rejections - 35 USC § 103

6. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

- (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 7. Claim 8 is rejected under 35 U.S.C. 103(a) as being unpatentable over Fortenberry.

Fortenberry discloses a snap-fit spacer system as shown above except for a plurality of grooves formed in an exterior of the spacer element wherein at least a first of the grooves is formed in a plane corresponding to a plane of a latching surface of one of the recesses. However it would have been obvious to one of ordinary skill in the art at the time the invention was made that providing grooves on an exterior of the spacer element is an obvious matter of design choice wherein no stated problem is solved or unexpected results obtained in providing grooves on the exterior the spacer element versus not providing the grooves.

Allowable Subject Matter

- 8. Claims 11-21 are allowed.
- 9. Claim 9 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, second paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

Application/Control Number: 10/052,160

Art Unit: 3726

10. The following is a statement of reasons for the indication of allowable subject matter: for claim 11, the prior art does not teach a method for interconnecting objects using first and second snap-fit fastener members wherein the first and second fastener members have substantially identical first and second ends, the first and second snap-fit fastener members being substantially identical, these in combination with the rest of the limitations in the claim. The examiner interprets the ends of the fastener members as representing lengthwise extremities of the fastener members.

For claim 17, the prior art does not teach a system for stacking circuit boards as recited in the claim.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Essama Omgba whose telephone number is (703) 305-2915. The examiner can normally be reached on M-F (10-7:30) First Friday off.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Peter Vo can be reached on (703) 308-1789. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
